AI Block Optimizer

Intelligent maintenance block planning using multi-factor optimization

 Optimization Algorithm

Rule-based weighted scoring (ML-ready architecture)

Eligible Requests (0)

0 marked as combinable — ready for merge optimization

No pending requests

All requests have been scheduled

Generate Optimized Block Plan

AI will analyze 0 pending requests and generate an optimized block schedule.

 **Run AI Optimizer**

Traffic Intensity by Hour

Current Input Summary

Total pending requests	0
Combinable requests	0
Non-combinable	0
Unique sections	0
Critical priority	0
High priority	0
