Performance metrics · Before vs. After AI optimization comparison

Simulated Demo Data — SIH 2026 Prototype

SIH DEMO SCENARIO – KALYAN–PUNE SECTION (28 AUG 2026)

Before AI vs After AI Optimization

3 separate department requests → 1 combined optimized block

Traditional Planning (WITHOUT AI)

Block: Engineering

Separate 4h block

Block: Signal & Telecom

Separate 3h block

Block: Traction Dist.

Separate 3.5h block

Total Blocks	3 blocks
Total Disruption	10.5h
Trains Cancelled	14

AI OPTIMIZER

AI-Powered Planning (WITH RailAvail)

✓ 1 Combined Optimized Block

All 3 departments · 01:00–05:00 IST (lowest traffic)

Total Blocks	1 block
Total Disruption	4h
Trains Cancelled	4
Trains Delayed	9
Conflicts	0
Asset Availability	91.6%
